

Healthy People 2030 Objectives and Measures

Vision

A society in which all people can achieve their full potential for health and well-being across the lifespan.

Overall Health and Well-Being Measures

8 broad, global outcome measures intended to assess the Healthy People 2030 vision

Core Objectives

359 measurable public health objectives that have 10-year targets and are associated with evidence-based interventions

Leading Health Indicators

A small subset of 23 high-priority Healthy People 2030 core objectives selected to drive action toward improving health and well-being

Developmental Objectives

Public health issues with evidence-based interventions but lacking reliable data

Research Objectives

Public health issues that are not yet associated with evidence-based interventions
